1963 Fiat Abarth 850 Replica

Liven up your commute with this practical Sub 1 litre supermini. Fitted with a four cylinder 850cc engine with a power output in excess of 127dB @ 9000 rpm, this car can be heard at least three parishes away.

Rare "Suicide Door" model

This is a rare "suicide door" model and still has the original single transverse leaf spring front suspension and rear wheel leather travel stops, endowing it with challenging handling characteristics that will demand your full attention. One of the first cars we've come across that makes a 1970's 911 feel a bit dull. In summary, an absolute hoot!
